

# STUART MAHER LIMITED

## QUALITY POLICY

Stuart Maher Limited (SML) will establish, implement and maintain a documented quality management system, certificated as meeting the requirements of BS EN ISO 9001:2008, that will apply to its business activities, including work associated with the construction and railway industries.

SML will ensure that all work is completed in accordance with the requirements of the client and appropriate standards.

The effectiveness of the management system is assessed through the setting and measurement of achievement of targets and objectives.

We are committed to the on-going improvement of the performance of SML and expect our staff and sub-contractors to operate within the quality management system. Accordingly, the necessary training and resources will be provided to facilitate the implementation of an efficient quality management system. In addition, all staff and sub-contractors will be involved in the development of the quality system that will be reviewed periodically to ensure its continuing improvement and effectiveness.
